

# 160-1-P Flange driver (pair)

## APPLICATION IMAGE

## DESCRIPTION

The 160 Series Flange Drivers are used in pairs to safely and accident-free disconnect flanged joints of pipelines in power plants, petrochemical or off-shore. They allow large and heavy-duty flanges to be disconnected, making it easy to carry out maintenance work even when there is a large access opening between the flanges.

## RANGE OF APPLICATION

For safe and accident-free disconnection of flange connections of pipelines in power plants, petrochemistry or off-shore.

## BENEFIT

- When the work is finished, the flanges are returned exactly to their original position
- Flange drivers are the perfect solution for repairing pipes and flanges
- Can also be used to replace bends, flange gaskets and metal seals on couplings as well as heavy equipment maintenance and many other jobs

## OPERATION

- Insert in pairs and disconnect the affected flange connection by actuation

## MASTER DATA

GTIN	4021176041167
Country of origin	DE
Material	Tool steel
Series	160-1
Net weight [kg]	5,87 kg
Gross weight [kg]	
Package contents	2 few
Packaging Act
